Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 31-34 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fox et al. (US Patent 4,184,230).

Fox et al teach a poultry neck cutting, breaking and stretching method which is structurally similar to the Applicant's method of manufacturing a cam for use in food processing machinery. More specifically, the device of Fox et al teach a cam 60 having a follower boundary or plastic guide 48. It is the Examiner's position that because three-dimensional follower boundary 48 exists, then the step of establishing has already occurred. Similarly, the steps of determining a two-dimensional representation to shape the plastic guide has already occurred. Lastly, the term "wrapping" broadly means "to cover". And as such, in Figure 11, the follower boundary 48 covers a side of the cam or along the cam to form a follower boundary. In regards to claim 32, an additional plastic cam/follower (unnumbered) is positioned above element 48, as seen in Figure 11. Regarding claims 33 and 34, bolts(unnumbered as seen in Figure 11, provide a way of removably attaching the plastic guide to said cam.

Response to Arguments

The Applicant argues that the reference to Fox et al does not teach a method of manufacturing a cam. However, Applicant's method steps do not specifically claim a method of manufacturing. For example, the following method steps of "establishing, determining, utilizing and wrapping" broadly read on the device of Fox et al.

Response to Amendment

Applicant's arguments filed 11-07-2005 have been fully considered but they are not persuasive.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Conclusion

Summary: Claims 31-34 are rejected.
